

Amaan Khan

Product Designer & Engineer

+91 8121602314 · mdamkhan.work@gmail.com · Hyderabad, India · linkedin.com/in/readmetxt · readmet3xt.github.io

PROFILE

Product Designer who ships the code too. An RCA-trained service designer with a full-stack build background, I take products the whole way — from user research and service blueprints to React architecture and AI integration. Most recently I solo-designed and shipped Otagon, a production AI SaaS, in six months. I build systems that are strategically sharp and technically real.

WORK EXPERIENCE

Otagon — AI Gaming Companion

Aug 2025 – Present

Founder & Product Engineer

- Spotted that gamers burn 3–5 minutes per question alt-tabbing to wikis — solo-designed and shipped a production PWA in six months: **30+ features**, 3 subscription tiers, and a 150K+ game library.
- Invented the OTAGON Tag system, a structured AI output format that reads game context straight from screenshots — **95%+ detection accuracy**, with answers that stay spoiler-aware and progress-calibrated.
- Designed **8+ genre-specific AI personas** and two interaction modes (Playing vs. Planning) from behavioural research, so guidance fits both the game and the moment.
- Architected the full stack (React, Supabase, Gemini AI) and cut API costs **~40%** with a context-summariser that keeps costs flat at any chat length — **zero critical incidents** since launch.

React 18

TypeScript

Supabase

Gemini 2.5 Flash

Framer Motion

Tailwind CSS

LemonSqueezy

Law.X — Legal AI Assistant

Mar 2025 – Apr 2025

Freelance Product Designer

- Reframed the brief from “make the AI smarter” to “make the AI *verifiable*” — a Glass Box interface that surfaces the model’s reasoning chain live, turning lawyer scepticism into trust.
- Designed a cohesive legal workspace across seven flows: split-pane layout, persistent tone and jurisdiction controls, a curated prompt gallery, and multi-client navigation — built for trust, precision, and flow.

KoinBasket — Crypto Trading Platform

Jun 2024 – Mar 2025

Senior UX Designer

- Led a cross-platform redesign unifying mobile and desktop, driving a **42% lift in user engagement**.
- Created BitBuddy — a live-trading social layer where influencers broadcast strategies and users trade from the same screen — turning a utility into a content-commerce platform.

Founding Designer

Oct 2022 – Jun 2023

- Sole founding designer: shipped the MVP in one week, built the design system that scaled to **70,000+ users**, led a full rebrand, and mentored the team’s first junior designer.
- Streamlined onboarding and Binance/Coinbase payment flows, cutting transaction friction **20%** with simpler authentication.

Softwire — LNER App Clip

Jul 2022 – Sept 2022

Designer, Internship

- Co-led UX for a 7-engineer build team: ran a 13-stakeholder workshop, field research at St. Pancras, and usability testing with 9 users — cutting ticket checkout time **40%**.
- Diagnosed two critical usability failures and rebuilt the booking flow into a single-screen interface with inline editing and Apple Pay — validated inside the 8-week internship.

ACADEMIC PROJECTS — ROYAL COLLEGE OF ART

Pebble Service Design · VISA Innovation Centre
Led service design end-to-end (1,200+ surveys, 24 co-creation workshops, data-backed personas); the Virtual Café concept was adopted into **VISA Innovation Centre's** collaboration roadmap.

Soul at Work Speculative Design · BCG
Co-created a speculative service quantifying women's unpaid labour (79 participants) — **Core77 Student Notable**, with the research framework adopted by BCG.

Stampede Service Design · WWT × Airbnb
Ran a co-creation workshop on a custom Power/Pace method that kicked off the WWT × Airbnb partnership — described as **"100x more productive"** than standard meetings.

EDUCATION

Royal College of Art — M.A. Service Design London, UK

London Business School — Brand Management London, UK

Osmania University — B.E. Mechanical Engineering Hyderabad, India

SKILLS & TOOLS

Design Service Design · UI/UX Design · User Research · Prototyping · Design Systems · Info Architecture

Engineering Full-Stack Dev · React 18 · TypeScript · Supabase · AI Integration · PWA · Performance Optimisation

Tools Figma · Framer · Webflow · Pencil.dev · Cursor · Claude Code CLI · VS Code · Vercel · Miro

HONOURS

- ◇ **Core77 Design Awards 2021** — Student Notable in Speculative Design
- ◇ **Critical Historical Studies, RCA** — Merit
