

Amaan Khan.

Service & Product Designer · I design end-to-end services, and build them.

Hyderabad, India · open to roles across India · +91 81216 02314 · mdamkhan.work@gmail.com · readmet3xt.github.io · linkedin.com/in/readmetxt

PROFILE

Service designer trained at the **Royal College of Art** (M.A. Service Design). I start with research and co-creation, turn what I learn into service blueprints and journeys, and then build working prototypes myself. I have run research-led projects with **VISA Innovation Centre**, **BCG** and **WWT × Airbnb**, was founding designer at KoinBasket, a crypto investing platform that grew past **70,000 users**, and have designed and shipped three products of my own.

SERVICE DESIGN WORK

Pebble · employee wellbeing service · RCA × VISA Innovation Centre · [case study](#) 2021

Project lead in a three-person team. **70 survey responses and 18 co-creation workshops (55+ participants)** shaped a persona-led service for remote teams. Testing showed people wanted connection more than focus tools, and the Virtual Café concept was adopted into **VISA Innovation Centre's** collaboration roadmap.

Surveys · co-creation workshops · personas · service concept · prototyping · user testing

Stampede · conservation partnerships · RCA × WWT × Airbnb · [case study](#) 2019

Designed a matchmaking method for conservation partnerships that were forming by accident. Organisations are compared on **Power and Pace** through seven animal archetypes. A 3-hour facilitated workshop started the **WWT × Airbnb** collaboration; WWT's partnerships manager called it "100× more productive" than their usual meetings.

Stakeholder research · partnership journey mapping · workshop design and facilitation · toolkit

I.V.I. (Invisible Value Income) Program · speculative service design · RCA × BCG Platinion · [case study](#) 2020

Co-created a speculative service that makes women's unpaid domestic work economically visible. Research with **79 women across 12 countries** (26 interviews, 53 questionnaires) fed a persona and a 2040 scenario. **Core77 Student Notable**; BCG adopted the research framework for internal workshops.

Interviews · questionnaires · persona from real schedules · speculative scenario · concept testing

LNER App Clip · rail ticketing · Softwire, London · [case study](#) 2022

Co-led UX with another design intern for a 7-engineer team. A 13-stakeholder workshop, observation at St Pancras and a timed test with 9 users cut the screen to five essentials and caught two usability failures, cutting ticket checkout time **40%**.

Stakeholder workshop · field observation · flow mapping · usability testing under time pressure

EXPERIENCE

Esberi · AI startup Jul 2026 – Present

Product Builder (Full-time)

- Own product work end to end as the team's only design-to-code person: user research, UI design and front-end implementation. Product details are under NDA.

Otalabs · own studio otagon2.github.io · [case study](#) Aug 2025 – Present

Founder

- Designed and built **Otagon**, an AI companion that reads a game screenshot and gives a hint that stops before spoilers. 30+ features across a phone PWA, a Windows desktop connector and a Supabase backend; public launch July 2026, early on user growth.
- Designed a structured AI output format that pulls game, location and progress from each screenshot, so hints match how far the player has got.
- Cut AI API costs **~40%** with a summariser that keeps cost flat however long a chat runs.

- Also built **Versus**, a live tournament tracker for game nights, and **ScreenShot**, PC-to-phone screenshot sync.

Pixel+Form · own design practice [case study](#)

Mar 2025 – Apr 2025

Product Designer (Contract)

- **Law.X**, a legal AI assistant: reframed the brief from "make the AI smarter" to "make the AI verifiable", designing seven flows that show lawyers the model's reasoning as it works.

KoinBasket · crypto investment platform [case study](#)

Senior UX Designer (Part-time)

Jun 2024 – Mar 2025

- Returned to lead a cross-platform redesign and a trust-first rebrand, with a **42% lift in user engagement**.
- Designed **BitBuddy**, a social trading layer where influencers share strategies and users invest from the same screen.
- Managed and mentored the company's first junior designer.

Founding Designer

Oct 2022 – Jun 2023

- Sole designer from the one-week MVP onward, on a product that helped grow to **70,000+ users**: curated coin "baskets" for beginners, non-custodial so funds stayed with the user.
- Simplified onboarding and Binance/Coinbase payment flows, cutting transaction friction about **20%**.

Softwire · London

Jul 2022 – Aug 2022

Design Intern

- LNER App Clip, described under Service design work.

Think Design · design research

2020

Design Research Intern

- Qualitative research on how communication norms changed during COVID-19.

EDUCATION & HONOURS

Royal College of Art

M.A. Service Design · London, 2021
Includes a Brand Management elective with London Business School

- ◆ **Core77 Design Awards 2021**, Student Notable, Speculative Design
- ◆ **Merit**, Critical & Historical Studies (dissertation unit), Royal College of Art

Osmania University

B.E. Mechanical Engineering · Hyderabad

SKILLS

SERVICE DESIGN	User research · co-creation workshops · service blueprints · journey mapping · personas · concept testing · facilitation · stakeholder management
PRODUCT	UX/UI design · prototyping · usability testing · design systems · information architecture
BUILD	React · TypeScript · Supabase · AI integration (Gemini) · PWA
TOOLS	Figma · Miro · Framer · Webflow · Claude Code · Cursor · VS Code
